

Lean Canvas

Project: MediTrack (SDG 3 - Good Health and Well-Being)

PROBLEM

Dosing Forgetfulness:

Patients forget schedules or misinterpret complex timing guidelines (e.g. food/meal rules).

Isolated Health Logs: Water intake, sleep hours, and medication tracking are disconnected, preventing a unified recovery overview.

Coaching Deficit: Generic wellness guides ignore patient compliance rates and history metrics.

Existing Alternatives:

Manual paper checklists, standalone phone clock alarms, or generic medical search index websites.

SOLUTION

Medication Reminder Grid:

Dynamic schedule builder with quick-tick compliance status logs.

Unified Tracker Panel:

Interactive widgets to log sleep cycles, daily water glasses, and active minutes.

Gemini Health Agent:

Secure personal chat assistant resolving database lookups.

KEY METRICS

Adherence Rate: Ratio of taken doses to total scheduled medicine alert items.

Logging Frequency: Total weekly water, sleep, and exercise inputs.

DAU/WAU Engagement:

Active users and session retention tracking.

UNIQUE VALUE PROP.

Contextual Health Coach:

Explains, summarizes, and coaches using user's secure, authenticated MongoDB history rather than acting like a generic web search chatbot.

Animated Health Score:

Radial chart compiling daily compliance and wellness trends into a single score out of 100.

High-Level Concept:

A secure health coordinator that acts as 'Fitbit meets automated medical compliance assistant.'

UNFAIR ADVANTAGE

Hybrid AI Routing Engine:

Answers factual queries locally (zero API load/latency) and calls Gemini only for comparative summaries and advice.

Secure Cookie

Authentication: Keeps sensitive medical lists and wellness history protected behind JWT session controls.

CHANNELS

Healthcare Partnerships:

Pharmacy networks and local doctor clinic referrals.

Corporate Wellness:

Employed health benefits tracking platforms.

Organic Web Search:

Target metadata tags optimized for search engine results.

CUSTOMER SEGMENTS

Chronic Illness Patients:

Strict compliance rules for ongoing treatments.

Elderly & Caregivers:

Simplified visualizer panels and family compliance checklists.

Health-Conscious

Professionals: Busy users tracking wellness goals.

Early Adopters:

Self-care enthusiasts and remote caregivers monitoring parent compliance.

COST STRUCTURE

Gemini API Token Fees: Scaled based on active user coaching requests.

Cloud Infrastructure: Hosting servers and Node endpoints (Vercel/Render/MongoDB Atlas cloud cluster).

Maintenance: Standard software bug patches, UI optimizations, and package upgrades.

REVENUE STREAMS

Premium Subscription: Monthly plan (■249/mo) for unlimited AI insights and clinician PDF reports.

B2B Enterprise SaaS: White-label wellness tracking portals licensed to corporate employers and local hospital networks.
